A.) Call to Order (7:00)

B.) Quorum Call – Roll Call

C.) Public Access (20 minutes)

✓ Conrad and Connor – Legislation Timeline Presentation

- Presentation
  - State appropriations, since the state funds the university and they have been cutting budgets, we have to cut appropriations. This includes student services and that is why we want to have more appropriations. Medical amnesty is a law in 41 different states and Iowa does not have this law in place. This is also called the good samaritan law, it’s a university policy but is not mandated outside of campus. The point of this law is that during any alcohol related emergency, and there will be no consequences for the person that is calling and the person that needs assistance. The next thing we are focusing on is the move in checklist. This makes landlords provide a move in checklist to tenants to help reduce the arguments with tenants and hopefully more people will not get into disputes about returning their deposits and when damage happened.

- Questions
  - Senator Correa: During RA training they said that the person who needs assistance does not have amnesty is this true?
    - Technically yes but, this law would mandate that the person who calls for help and the person seeking assistance will also have amnesty.
  - Senator Smith: Do you know if the medical amnesty laws in the 41 states also include drugs?
I’m not sure what the other 41 states have. We chose not to advocate for the inclusion of drugs because it would be easier to pass through and we can revisit it to include drugs later on.

- Senator Turnquist: In the table with the appropriations that you used, is inflation counted for?
  - Yes

- Senator Verry: Do we know what committees we are hitting with the checklist?
  - Yes it’s the local government committees.
